Summary

Highly motivated 3rd year IT Security student with a strong passion for backend web development. Experienced in developing web applications using backend technologies such as Django and PHP. Skilled in database management with MySQL and MSSQL Server. Currently working on a Django project to create a Christian website where testimonies can be published in video and text format. Eager to expand knowledge and skills in backend development while contributing to meaningful projects. Expected to graduate in June 2024 from Cyprus International University.

Skills

- Backend development with Django and PHP
- Databases: MySQL, PostgreSQL
- Basic knowledge of version control systems: Git, GitHub
- Problem-solving and troubleshooting
- Excellent communication and collaboration skills

Education

- Associate Degree in Computer programming | Cyprus International University, Nicosia, Cyprus | 2020-2022
- Higher Certificate in Information System Engineering | Pearson Institute of Higher Education, South Africa | 2018-2019

Relevant Coursework

- Web Development Fundamentals
- Secure Web Application Development
- Database Management Systems
- Network Security
- Software Engineering Principles

Projects

1. Christian Testimony Publishing Website (**Ongoing**)

- Developing a Django-based web application to create a Christian website where users can publish testimonies in video and text format.

2. Travel Management System

- Developed a web application to manage travel bookings and reservations.
- Utilized PHP for backend development.
- Integrated database management with MySQL.
- Collaborated with frontend developers to ensure smooth interaction between frontend and backend components.
- Deployed the application on a local development server.

3. Sales Management System

- Created a web-based sales management system for tracking inventory and generating sales reports.
- Utilized PHP and MySQL for backend development.
- Collaborated with a team to ensure efficient data handling and smooth functionality.
- Conducted thorough testing and debugging to deliver a reliable system.
